

# F100102 Quint 2-Input OR/NOR Gate

## General Description

The F100102 is a monolithic quint 2-input OR/NOR gate with common enable. All inputs have 50 kΩ pull-down resistors and all outputs are buffered.

Refer to the F100302 datasheet for:

- PCC packaging
- Lower power
- Military versions
- Extended voltage specs (−4.2V to −5.7V)

**Ordering Code:** See Section 8

I <sub>IL</sub>	Input LOW Current	0.50			μA	V <sub>IN</sub> = V <sub>IL(Min)</sub>	

**Note 1:** Absolute maximum ratings are those values beyond which the device may be damaged or have its useful life impaired. Functional operation under these conditions is not implied.

**Note 2:** Parametric values specified at -4.2V to -4.8V.

**Note 3:** The specified limits represent the "worst case" value for the parameter. Since these "worst case" values normally occur at the temperature extremes, additional noise immunity and guard banding can be achieved by decreasing the allowable system operating ranges.

**Note 4:** Conditions for testing shown in the tables are chosen to guarantee operation under "worst case" conditions.
