### FEATURES

- Reliable monolithic construction
- Nickel barrier terminations
- Top side marking for easy identification
- Concave or convex termination styles
- Square or scalloped edges available

### BENEFITS

- Saves board space over equivalent rated chip resistors
- Eliminates up to seven pick & place operations
- Single component reliability
- Leadless chip, reduced inductance
- Mounts close to active devices

### APPLICATIONS

- Pull up/pull down resistors for digital IC's
- Series termination on high speed data busses
- Current limit for LED displays
